

COMPANY PROFILE

WeighTech is a leading manufacturer of scales and equipment for the food processing industry.

With over 20 years experience in the design, development and service of scales and speciality equipment for a wide variety of applications, WeighTech has earned its reputation as a trusted supplier of reliable and affordable products that meet and exceed customer expectations. WeighTech remains focused on expanding its past success in the meat and poultry industry.

Located in the center of the poultry industry in Waldron, AR, WeighTech offers a full production facility, engineering staff and service support to service its customer base.

The Leader in Scale Systems

WeighTech[™]

In today's fast paced processing world, efficient, reliable and rugged scale systems and equipment are crucial.

"We chose WeighTech due to their ability to customize and produce quality products for our specific needs. Their equipment has performed consistently; their service is excellent."

Jack Greenfield
Ozark Mountain Poultry

SERVICES

WeighTech offers a highly trained 24/7 support system staffed by our service technicians across the country, available by phone or email.

PRODUCTS

We offer a broad range of equipment for your food processing needs - from a standard line of scales to custom designed processing equipment.

Our products feature our patented WeighTech indicator. Our permanently sealed MicroWeigh indicator complies with industry standards for protection from water ingress under IPX9K (pressure washing), NEMA 4 (hosedown), NEMA 6 (water immersion), IPX7 (water immersion) and IPX8 (water immersion simulating water pressure over 80-feet deep). MicroWeigh has also satisfied tests for dust resistance under IP6. We know of no other manufacturer of an electronic indicator that has passed all these tests.

We have made many advances in the scale industry to minimize costs and maximize production. Our high standards for design and efficiency continues throughout production as all products undergo a rigorous quality check before shipment to the customer.

CUSTOM PROGRAMMING

Our engineering and software programming staff have numerous years of experience designing and implementing custom solutions for specific customer needs. Within the industry, WeighTech has gained the reputation for its efficient, reliable and custom solutions, giving our clients cutting edge technology at an affordable price.

PRODUCTION CAPABILITIES

Our 16,000 sq. ft. facility along with our highly skilled workers enable us to turn out quality products to your specifications. WeighTech utilizes highly durable stainless steel for most food processing line equipment except for specially-designed water-tight electronic enclosures and housings. In addition we use state of the art technology and tools such as our laser production tool which allows us to turn out products at a faster rate.

PARTS INVENTORY

For our customer convenience and service, WeighTech carries a general parts inventory for repairs or replacement needs that arise. Our part orders are shipped same day and can be delivered within 24 hours if needed.

PRODUCT OFFERINGS

- Bench scales
- Bagging scales
- Data scales
- Tote checks
- Checkweighers
- Inline conveyors
- Machine control indicators
- Sizers
- Distribution systems
- Trim Stations
- Tray Pack
- Other custom scale applications
